## The Bose L1™ Family of Products

Replace conventional stage monitors, mixers and PA speakers with one sleek, powerful system. Too good to be true? **It's true.**

Hello. My name is Shawn Smith and I am an artist Product Specialist for the new Bose L1™ family of products. If you are unfamiliar with this unbelievable new technology, please let me take a moment to introduce you to it: The Bose L1™ family of products is an all-in-one solution that you can carry in 2 hands (mixer, amp, main, monitor), it serves as a monitor AND a main system that fills a hall with 500 people, and it's so compact enough that you can fit it in a MINI Cooper, or even FLY with it! I have been doing full-time

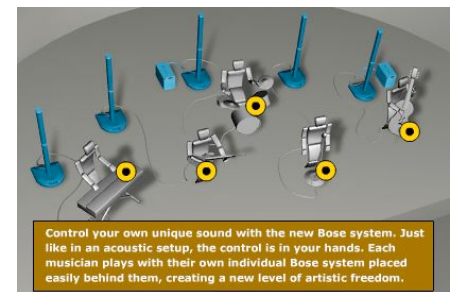

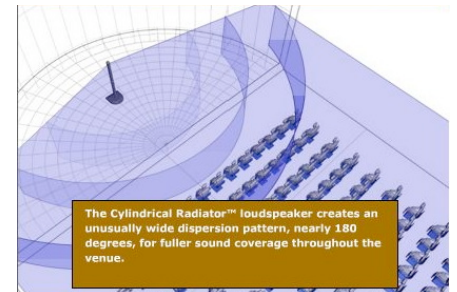

music ministry for 14 yrs, and it is the best live sound I've ever heard, period. The cost for this breakthrough technology from Bose? Less than \$2,000 for a complete system. And...it sets up in less than 5 min's. No kidding. Too good to be true? I know, I thought so too. Well, I am here to tell you: It is true. This is unlike any system you have ever seen or heard, and I am convinced it is going to literally revolutionize the industry. I've been using it for 3 years now, and I still can't get over how great it sounds, and how it has changed my life. I have a friend who recently told me: "If that tiny looking tower replaces the van load of equipment you traveled with, I'm floored". I responded, "Indeed." Not only does it replace it, but it sounds better, I can hear myself better than ever, there's no feedback, and it costs less. Not to mention all the time it saves on set-up, tear-down, maintenance of equip, etc. This is the most revolutionary idea to hit live sound amplification in 30 years.

 Double bass package with  
 T1 ToneMatch™ audio engine  
**\$3,297.00**

**My Testimony with the Bose L1™**

I bought the Bose L1™ because of the return policy: 45 day money back guarantee if not fully satisfied. This kind of offer is unheard of in live sound. I fully expected that I would need to return it within a week, but I couldn't resist the deal. I knew my venues would be far more challenging than the small room I heard it demoed in. To test out the Bose L1™, I set it up side by side with my current Mackie system, which I loved (2-450's on trees, 1-15" Sub, 1-1202 mixer, 1-Shure inner-ear monitor). I set them up in an 1,100 seat gym at a High School. This room was an acoustic

nightmare. It took me an hour and ten minutes to completely unload the Mackie system, set it up, and get a sound check--which was typical if I didn't have help to unload. It took me less than 20 min's to unload and unpack the Bose L1 from it's shipping boxes, figure out how to put it together, set it up, and sound check it. I had two 1 hr sessions each day with the students. The first session I went with the Mackie system alone. The second session I used the Bose L1™ as a monitor only, with the Mackies as mains. By the second day, I didn't even set up the Mackie system, and had the Bose set-up down to less than 10 min's. I played for 3 days w/600 students clapping/singing/screaming. One Bose L1™ w/2 Bose B1™ subs FILLED THE ROOM with sound. I was sold.

**What is a Product Specialist?**

In Jan '05, I was honored to be invited to contract with Bose as one of their 35 artist Product Specialists touring with the L1. I continue to do music ministry and speaking full-time, but I now I tour (even FLY!) with the Bose L1™ and do all of my gigs with it. While touring, I demonstrate the L1 for churches, schools, camps, hotels, colleges, coffee houses, fire halls, DJ's, etc --anyone who needs a portable sound system. I collect a commission for each one I sell, and I've been blessed to help a lot of artists, churches, Praise Teams, and DJ's take advantage of this incredible technology.

**Which system is best for you?**

The Bose L1™ family of products was designed for live music, but also works well for spoken word, indoors and out--particularly in acoustically challenging spaces like large halls, gymnasiums, and churches. The L1™ Model II w/T1 ToneMatch™ audio engine works especially well for high-end audio needs for professional musicians, singers, and bands of all kinds. The L1™ Model I is perfect for music & spoken word. Both systems can fill spaces of up to 500 people, are extremely portable, and set up in minutes! I know, it's hard to believe. You just have to see and hear them for yourself. For more information, and to determine which system would be best for your needs, contact me for a 45 day trial, and hear for yourself the most revolutionary idea in live sound in 30 yrs.
